Assignment: Choosing Passwords

When choosing a password, it is important to choose a strong, secure password that will be difficult for others to figure out. Hacking into another person's account can vary from something small like losing one's privacy to something more serious such as identity theft.

Read the following article on things to consider when creating a password. As you read, write down 15 key points (or important things) about choosing good passwords. When finished, hand in your paper.

Remember to:

- use complete sentences
- write the assignment information at the top of your paper including:
 - Name
 - Date
 - Assignment (the name of this assignment is: *Choosing Passwords*)
